### H7ET Time Counter

#### PNP/NPN Universal DC Voltage Input Model With Backlight

1. Contact Input (Input by a Relay or Switch Contact)
2. Solid-state Input

**Note: 1.** Terminals 2 and 4 (input circuit and reset circuit) are functionally isolated.

2. Select input transistors according to the following:  
Dielectric strength of the collector  $\geq 50$  V  
Leakage current  $< 1 \mu\text{A}$

**Note:** \*Recommended power supply; eg. OMRON S8VS

**PNP/NPN Universal DC Voltage Input Model Without Backlight**

1. Contact Input (Input by a Relay or Switch Contact)

2. Solid-state Input

**Note:** 1. Terminals 2 and 4 (input circuit and reset circuit) are functionally isolated.

2. Select input transistors according to the following:  
 Dielectric strength of the collector  $\geq 50$  V  
 Leakage current  $< 1 \mu\text{A}$

**AC/DC Multi-voltage Input Model**

**No-voltage Input Model**

1. Contact Input (Input by a Relay or Switch Contact)

**Note:** Use Relays and Switches that have high contact reliability because the current flowing from terminals 1 or 3 is as small as approx.  $10 \mu\text{A}$ . It is recommended that OMRON's G3TA-IA/ID be used as the SSR.

2. Solid-state Input

(Open Collector Input of an NPN Transistor)

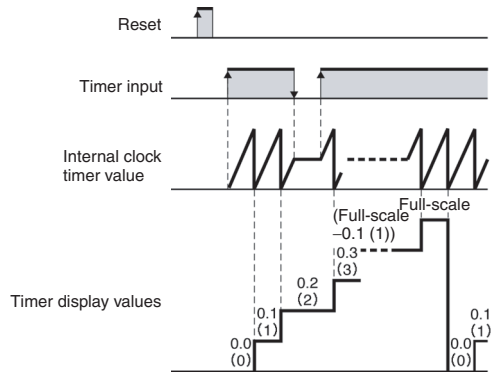

**Note:** 1. Residual voltage in the output section of Proximity Sensors or Photoelectric Sensors becomes less than 0.5 V because the current flowing from terminals 1 or 3 is as small as approx.  $10 \mu\text{A}$ , thus allowing easy connection.

2. Select input transistors according to the following:  
 Dielectric strength of the collector  $\geq 50$  V  
 Leakage current  $< 1 \mu\text{A}$

# Operation

## ■ Operating Modes

### H7ET Time Counter Incrementing Operation (Up)

## Nomenclature

**Reset Key**  
Reset the count value. Not operable under key-protect.

**Time-range switch**  
If the time-range setting is changed, the present value will not be held and so press the Reset Key on the front panel.

**Key-protect Switch**  
The Reset Key is not operable while the key-protect switch is set to ON.

Setting (see note)	Time range	
	H7ET-N□□-□□	H7ET-N□□1-□□
Front panel ↑ 	0.0h to 3999d23.9h	0s to 999h59min59s (default setting)
Terminal block ↓ 	0.0h to 999999.9h (default setting)	0.0min to 9999h59.9min

Setting (see note)	Key-protect
Front panel ↑ 	OFF (default setting)
Terminal block ↓ 	ON

**Note:** Perform switch setting before mounting to a control panel.

# Dimensions

**Note:** All units are in millimeters unless otherwise indicated.

## H7ET-N

### Panel Cutout Separate mounting

### Dense mounting

Waterproofing is not possible for dense mounting

- When mounting, insert the Counter into the cutout, insert the adapter from the back and push in the Counter while making the gap between the front panel and the cutout panel as small as possible. Use screws to secure the Counter. If waterproofing is desired, insert the waterproof packing.
- When several Counters are installed, ensure that the ambient temperature will not exceed specifications.
- The appropriate thickness of the panel is 1 to 5 mm.

### Dimensions with Flush Mounting Bracket

**Note:** A Compact Flush Mounting Bracket (Y92F-35) can also be used. Refer to *Accessories* for details.
